

INTERNATIONAL SCHOOL OF MEDICINE

AFFILIATED TO INTERNATIONAL UNIVERSITY OF KYRGYZSTAN

ABOUT KYRGYZSTAN

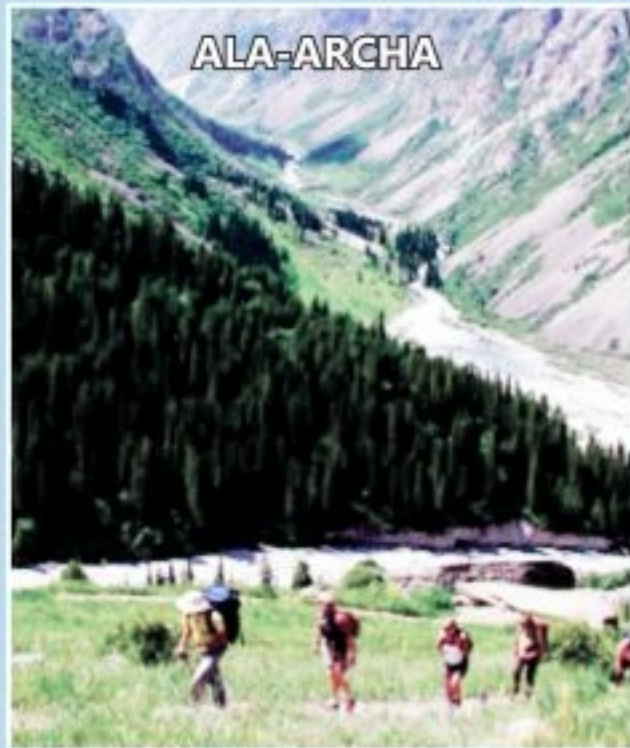

Kyrgyzstan is one of the Central Asian republics bordering Kazakhstan, China, Tajikistan and Uzbekistan. It is a mountainous country, 93% of its territory is located at over 1000 meters above sea level. Lake Issyk-Kul in the north-eastern Tain Shan is the largest lake in Kyrgyzstan and the the second largest mountain lake in the world after Titicaca. The highest peaks are in the Kakshaal-Too range, forming the Chinese border. Peak Jengish Chokusu, at 7,439 m (24,400 feet), is the highest point and is considered by geologists (though not mountaineers) to be the northermost peak over 7,000 m (23,000 feet) in the world. Heavy snowfall in winter leads to spring floods which often cause serious damage downstream. The runoff from the mountains is also used for hydro-electricity.

The climate of Kyrgyzstan is a sharply continental climate with very hot summers and cold winters in the mountain regions. Approximately 247 days a year are shiny. The temperature in January varies between -4° to -14°C ; in july varies between $+12^{\circ}$ to $+40^{\circ}\text{C}$. In winter warm clothes needed and in summer light clothes such as shorts and T-shirts are essential.

In Kyrgyzstan one can see the transition from the subtropical climate of the Fergana valley and semi-desert of the Chui and talas valleys to the eternal frost of the mountains. In the Valleys the wintertime is warmer than in the mountains. Because of this light clothes are appropriate in summer, but in winter, mediums to warm clothes are essential.

KYRGYZSTAN AS TOURISM

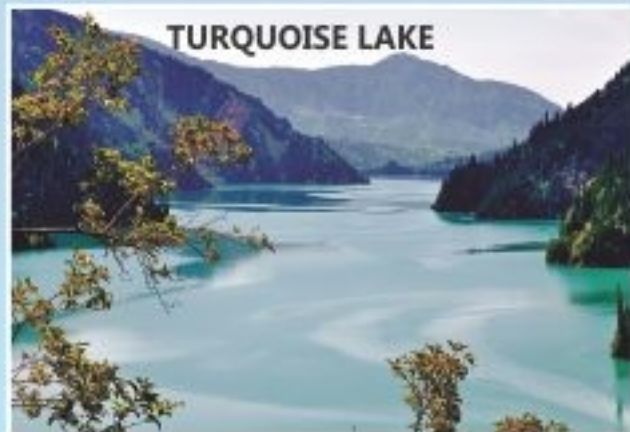

ALA-ARCHA

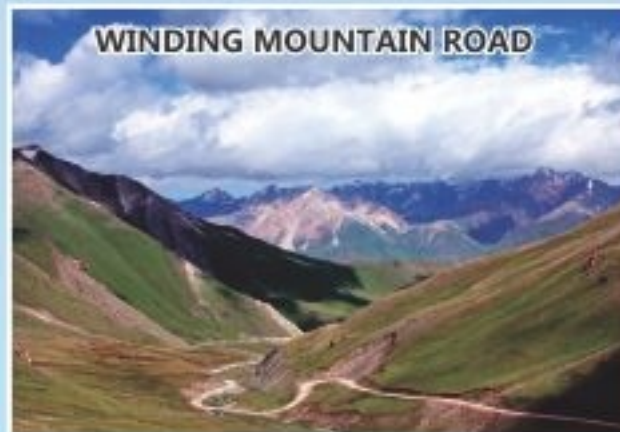

Ala-Archa Valley is situated in the highest part of the Kyrgyz Range of the grandiose mountain system of Tien-Shan, 35 km from Bishkek – the capital of the Kyrgyz Republic. "Ala-Archa" means "variegated Archa" from Kyrgyz. Ala - Archa is located on the territory of gorge. Natural Park is occupying about 20 hectares of territory, including such climate-landscape zones as subalpine, which surprising everytime there tourists. This Natural Park got his name because of the instant growing woods plant and creeping vegetation of Archa all along the gorge.

In Ala-Archa gorge were founded around 1100 types of plants, what arrange about 1/3 all of types of Kyrgyz flora. Animal world of Ala-Archa is rich and peculiar. Here we can meet a lot of field animals and birds, animals with interesting and unusual biology. Any types of hunting is forbidden in the territory of Natural Park.

Here everyone can breathe the fresh mountain air and sit under the shade of slim Tien-Shan firs observing the wonderful panorama of the glaciers around and snow-covered peaks, meet herds of ibex and mountain goats, visit mountain hut – the start place almost of every ascent. Guiding by your desire and physical condition you can choose different variants of walking, hiking and trekking that we worked out. All of them start from the former alpine camp, which is located in the fir forest zone on the altitude 2100 m above sea level.

TURQUOISE LAKE

WINDING MOUNTAIN ROAD

ISSYK-KUL

Issyk-Kul is the largest region of Kyrgyzstan and its most popular tourist destination.

The region is situated around Lake Issyk-Kul, the world's second largest alpine lake, after Titicaca, 1600 m above sea level, 170 km long, 70 km wide and 695 m deep. "Issyk-Kul" means "hot lake" in Kyrgyz, as it never freezes. The mountains and the marine microclimate produce a wild, unique environment. The mountains surrounding the lake are a shelter for very rare animal species (snow leopard, cutter-loader, wild boar) and plants, such as the Tyan-Shan fir. Impetuous, violent rivers, starting from snow-white glaciers, carry their waters to the lake. In 2001 Issyk-Kul was designated by UNESCO as a Man and Biosphere reserve.

Issyk-Kul offers the highest, snow-capped peaks in the country; and the opportunity to trek, cycle, climb, ski, raft, windsurf, tour on horseback or just relax at one of the famous coastal resorts.

A large part of inhabitants are farmers. After the collapse of the Soviet Union, almost all industries ceased to exist. Main means of transportation is with horses and donkeys pulling wooden carriages. Due to the mild climate fruits grow in abundance, and trees filled with apricots, pears, apples and peach are inviting us to try the sweet and on the spot. As there are too many fruits anyway, nobody cares to let a passing by visitor steal a few. Towards the larger city of Karakol, peasants are also selling the sweetest and best quality of their fruits: a kilogram of apricots costs 1 Som (about 2 cents). Melons, dried fish from the lake, grapes and chestnuts are very popular here as well. Prices for us are unbelievably low. Still with an average monthly salary of 25 dollars, a kilogram of apricots at 2 cents must be expensive. Some dealers also buy in large quantities and transport the fruits over rough roads into 700 km close capital Bishkek or even further into Kazakhstan.

THE CITY BISHKEK

The capital, Bishkek, is situated in the Chui valley in the north of country, between the Talas valley in the west and the eastern Issyk-Kul region. It was founded in 1878 and originally was called Pishpek, which is the name of the wooden paddle with which the Kyrgyz make their Kymyz (Kumiss - fermented mare's milk), the national drink. Later, during the Soviet Union period, it was named Frunze after the famous Russian General Mikhail Frunze. At the time of Independence in 1991, it was renamed Bishkek.

The City has been influenced by the Russians from the beginning, and actually more or less built by them. Most of the buildings you see today are built in a typically Soviet architectural style, and the trees in the parks, boulevards and alleys are watered by a system of canals built by Russians. Those boulevards and parks make this a pleasant city to live in, as they provide total shade in summer, when temperatures may reach 40 degrees Celsius (105 F), and the open canal system also helps to keep the summer bearable, Bishkek is known to be one of the greenest cities in Central Asia as a result of the planning.

Bishkek cannot claim to be one of the major cities of the world, like London, Paris or New York. It is however, the Capital City of Kyrgyzstan and does have number of important and interesting buildings, monuments, Paris or New York, It is, however, the capital city of Kyrgyzstan and does have a number of important and interesting buildings, monuments, parks, museums, galleries, theatres and other places worth seeing or visiting. This is not meant to be an exhaustive guide to the city but simply a brief introduction to the city and its history

Like Kyrgyzstan generally, the climate is Continental-which means hot summers and cold winters. The average annual temperature is -1°C. The atmosphere is generally dry with rainfall occurring mostly in spring. There is an average of 322 days of sunshine per year. There are two rivers flowing through the city - The Alamedin and Ala-Archa - both tributaries of the River Chui. Also the grand Chui Canal flows through the city. The city is said to be the greenest in Central Asia with more trees per head of population than any other.

INTERNATIONAL UNIVERSITY OF KYRGYZSTAN

The International University of Kyrgyzstan (IUK) was created in March 1993 by a decree of President of the Kyrgyz Republic (State license AL #039) that gave the University a status of international higher education institution. The founders of the IUK are the Ministry of Education, Ministry of Foreign Affairs, National Academy of science and San Francisco State University (USA). In short period of time the IUK has become one of the leading higher education institutions of Kyrgyzstan and Central Asian region. The IUK awards diplomas of state standard.

The IUK is located in Bishkek - the capital of the Kyrgyz Republic. Building of the IUK is one of the oldest and most beautiful buildings of Bishkek that is located on a central street of the City. In addition to Bishkek Campus, the university has three campuses which are located in the following cities; Osh and Jalal-Abad (southern region of Kyrgyzstan) and in Karakol-city (Issyk-Kul region of Kyrgyzstan)

The Kyrgyz-Russian institute for Distance Learning was created jointly with the modern Humanitarian University of Moscow, under auspices of the intergovernmental committee on knowledge propagation and adult education in CIS. Graduates of this Institute get diplomas from Higher Education of Kyrgyz Republic and the Russian Federation.

The Kyrgyz-Indian Institute for Distance learning was created jointly with the Indra Gandhi National Open University (India). Also, the European Resource center (IUK-Arnhem Business School, the Netherlands), American Resource Center (IUK-University of Michigan, USA), Education Information resource center (IUK-Bern University, Switzerland), Regional Academy of CISCO, International Telecommunication Union, Center of Higher Education Institutes intergration to the bologna process (IUK-EU) were created.

All lessons are conducted on western education standards at the IUK-credit hour's system. The IUK students have the opportunity to transfer from second and third year to the universities of the USA and Europe.

The IUK is a member of the World Association of Universities and Colleges (WAUC), Association of European Universities (EUA), European Association for International Education (EAIE), Global Alliance for Transnational Education (GATE), Federation of the Universities of the Islamic World (FUIW), International Association of Universities under UNESCO.

The IUK was awarded with International Gold Quality Star 2001, founded by the BID (Business Initiatives Directions)- organization, which during the many year selects companies and institutions with strong activity and business, leadership, new technologies implementation and innovation. In 2001 the IUK has entered to the list of 30 best universities of the Commonwealth of Independent States.

Dear Students, Welcome to Kyrgyzstan, and the International University of Kyrgyzstan (IUK)- one of the leading higher education institutions in the Kyrgyz Republic

Dr. Asylbek Aidaraliev
President of International University of
Kyrgyzstan (M.D., Ph.D.)
Academician of Kyrgyz National Academy of Science

We are pleased that you have chosen the IUK as the place where you aim to develop your skill and knowledge. For our part, we will do our best to make your stay a worthwhile and memorable experience.

This booklet has been designed to make it easier for you to feel at home in Kyrgyzstan. Here you will find information on a range of issues we think you should be aware of before you arrive: general information to Kyrgyzstan and to IUK, formalities of coming to stay and study here, programs for study, and about social and cultural activities in Bishkek. The IUK is the first university in the central Asian Region to have signed the world university charter. It means that the IUK joined the Bologna declaration, which establishes common European requirements to organization, level of higher education, documents about higher education and regulates rules of mutual recognition of diplomas in country-members of Bologna process. Converting the credit hours in IUK to unified training hour, European credit transformation system (ECTS) lets the diplomas issued to students be recognized in European Union (EU) countries. The world university charter was signed by more than 700 universities in Europe, USA and Asia.

I am sure that studying at the IUK will give you not only knowledge and skills, but also new friends, an opportunity to meet interesting people, all the things that make a student's life unforgettable. I hope that you will make a right choice and become students of the IUK. An introductory booklet like this one, can never include everything, but we hope it will give you a helpful start. Please do not hesitate to contact us for further information.

The staff of IUK and I are looking forward to your arrival and wish you every success during your tenure here. We hope that you enjoy your stay in Kyrgyzstan.

"We are inviting you to our university to get one of the most interesting and human professions - the profession of being a medical doctor."

Chyngyshpaev Sh.
Rector of International School of Medicine,
M.D., Ph.D

Our Medical school has considerable experience in training doctors for foreign countries and employs the best specialists of the Kyrgyz Republic.

Strong intellectual potential, close cooperation with leading medical institutions, the use of modern technologies and an individual approach to each student. We ensure high quality of training and professional achievements for our graduates. Training in our medical school is conducted in line with up-to-date standards, applied in European countries. We are offering our students training programs, best fit for the needs of their home country or of places where they want to practice medicine in the future.

We apply training techniques that make it possible for students to develop problem-solving skills, learn how to get information independently and improve abilities to assess new information critically. We are confident that wide access to clinical settings, work with patients, and participation in surgeries will help students develop good clinical skills and a human approach.

We pay particular attention to personal growth of students by applying individual to each of them and help them solve all their problems related to training, accommodation, privacy and security. Once you become a student of our school, you will be a part of us we are personally responsible for each one of you, and when you leave, we want you to remember us and stay in touch.

International School of Medicine (ISM, 2003)

An international, higher educational institution, is a structural unit of IUK, created to train medical specialists for foreign countries, conduct medical research in cooperation with leading health centers of the country and provide high quality, medical services to the population of Central Asia.

ISM was established on a special resolution of the Kyrgyz Government. the Kyrgyz Government's resolution #60 dated February 5, 2004 introduced ISM into IUK, which is one of Kyrgyzstan's top universities, highly rated for its substantial experience in training of foreign citizens. This higher educational institution aims to ensure maximum opportunities for those who want to become doctors and work anywhere on the globe.

"Medical profession is a great endeavor and we'd like to acknowledge each one of you for having chosen to be in this noble profession."

**Dr. Phani Bhushan Potu,
Vice Dean, International Students**

Dear Applicants,

Studying at ISM creates a path towards building your career in this gracious field of public service. Through your tenure at ISM, you will be provided with various opportunities to express your devotion towards the good of mankind by participating in various medical apprentice programmes.

We, at ISM Edutech are given the great opportunity by the International University of Kyrgyz Republic to facilitate aspiring students for realising their dreams. We create a conducive atmosphere for study and development. Along with students, even parents are kept involved by posting monthly attendance details and progress reports on the academy website. Along with looking after academic, curricular needs, the institute also coaches students for the MCI screening test from the 1st year of MBBS.

ISM creates a homely ambience for students at the university campus by looking after various needs such as providing with Indian food, laundry services and other house-keeping facilities. By taking care of these basic amenities, the institute ensures that students devote all their time to what they are here to accomplish excellence in the field of medicine !

At ISM Edutech, we can assure you that students will discover ample opportunities to explore and discover their interests and hone their thinking at every level. The blend of cross-cultural students will also ensure exposure to newer cultures and ethos. This aids in developing global sensibilities amongst individuals and forwards overall development in the International context.

We'd like to invite you to take this magnanimous leap towards a bright future in medicine. Join the ISM family!

**Dr. Phani Bhushan Potu receiving Dhanwantri Award from
Chief Minister of Chhattisgarh Sh. Raman Singh**

Mission of ISM-IUK

The basic mission of the school is to train highly qualified specialists, conduct scientific research in medicine of mountains, and provide health services to the population of Kyrgyz Republic and its neighboring countries. Training at ISM is conducted with the most up-to-date educational technologies used in order to ensure highly efficient training of doctors. The ISM's primary goal is to produce highly qualified doctors who will be able to work successfully in any place in the world.

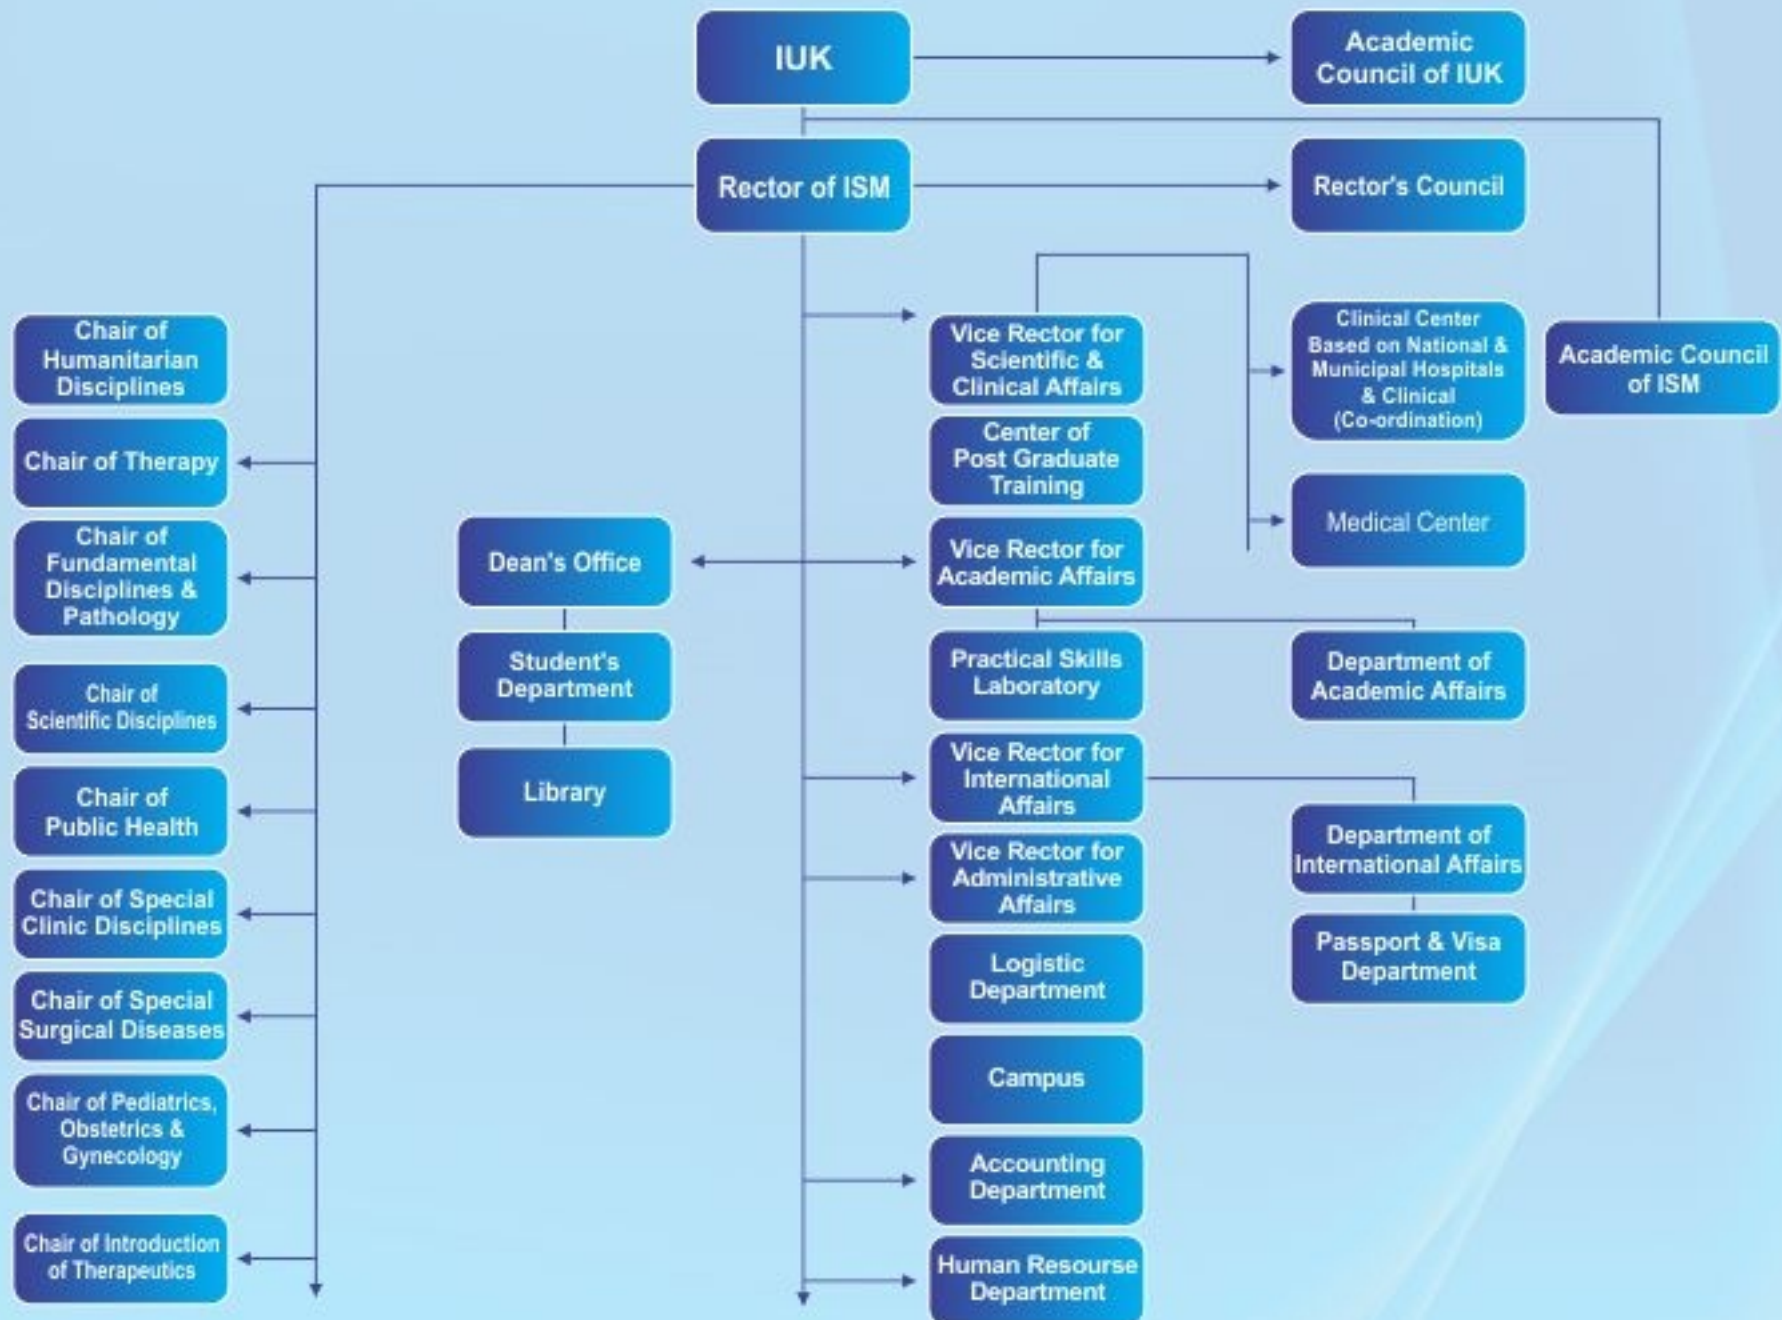

ISM is the modern, dynamic, higher educational institution of a new formation, focused exclusively on the export of medical formation. Owing to a combination of modern approaches to training and traditions of the soviet educational system, ISM provides a high quality of professional training and possesses high competitive potential in the market of medical formation.

ISM is one of the top higher educational institutions in Kyrgyzstan with the medium of instruction in English. As a part of IUK, the ISM has signed the Bologna agreement (EU), which sets up single and uniform European, educational standards.

The International school of Medicine of the International University of Kyrgyzstan is an official, state educational institution with the license of the Ministry of Education and science of Kyrgyz Republic for medical education in General medicine within 5 years of study (Official license no. 540).

“Organizational Chart of International School of Medicine”

Programs of International School of Medicine

Basic Medical education (5 years)
Post-graduate specialization residency (3 years)
Ph.D. studies (3 years)
Doctoral studies (4-5 years)

Basic Medical Education

General Medicine - 5 years of studies for school graduates with 12 years of educational experience (mostly for British Commonwealth citizens). This program is implemented with English as the language of instruction. The program is implemented with the use of integration and modules based, training technology introduced in Kyrgyzstan with the technical support of World Health Organization experts and through the application of credit hours system.

Post Graduate Studies - (Residency Program, 3 years)

Are conducted in a board range of such clinical fields as: obstetrics and gynecology, surgery, traumatology and orthopedics, pediatrics, therapeutics and others. ISM also offers postgraduate, non-clinical training programs for the degrees of physician-laboratory assistant and Master of Public Health.

Scientific Research Programs

Are offered in various fields with subsequent presentation of relevant dissertations leading to scientific degrees of: Candidate of 'Medical Science' awarded at ASPIRANTURA (on completion of Ph.D studies) 'Doctor of Medical Sciences' awarded at DOCTORANTURA (on completion of doctoral studies).

CLASSROOM

CLINICAL Work

ISM has specialized scientific research laboratories run mostly by ISM with its partner organizations. The clinical, biochemical, immunological, neurophysiological, bacteriological and radiological laboratories are currently in operation. ISM clinical chairs are based in leading clinical settings and scientific research centers of the country, which makes it possible to organize effective clinical training and provide access to patients. ISM staff actively participates in treatment of patients and research at these organizations. ISM maintains partnership relations (has long-term agreements on joint activities) with major leading medical institutions and scientific research centers of the country making it possible to pursue the policy economically beneficial to both parties and implement joint partnership programs. In particular the ISM partners the jointly conduct training, research and treatment.

Library

Like every higher education institution ISM has a library that contains a huge collection of Medical books. Latest foreign editions of commonly used books are available in sufficient numbers. New editions of books are regularly updated with WHO series and periodicals, in English and in Russian, and all the measures are taken for availability of books to every student. The library possesses a unique book stock (above six thousand items) including traditional and new information carrying mediums, among them there are books in the line of medicine: therapy, pediatric, oncology, dermatology, gynecology, histology, microbiology, pharmacology, orthopedic, etc.

At this moment there are registered about 600 students and 80 teachers in the library. New information technologies are introduced for the smooth functioning of the library. The library's reading hall have PCs connected to the network, so students get free access to the global Internet.

STRUCTURE OF ISM

The International School of Medicine has a mobile and compact structure, allowing to give quick responses to any challenges of the time and to introduce innovative technologies in educational, scientific and medical performance. Financial, technical and intellectual capabilities available at ISM provide students with an access to the most up-to-date training technologies, and access to internet and multimedia capacities. Training in clinical disciplines at ISM is conducted at Bishkek municipal in-patient settings, which ensure adequate number of patients for training. Research and treatment are carried out by ISM staff in the most vital fields of modern medicine with the focus on specifics of mountains, pertaining to the geographical location of Kyrgyzstan.

Particular attention is paid to the quality of medical services rendered. ISM students have the opportunity to take part in research and treatment. The ISM IUK in its work follows the standards posed by World Federation of Medical Education to medical schools. The ISM IUK constantly conducts self-attestation to ensure permanent quality improvement.

ISM has specialized, scientific-research laboratories run mostly by ISM with its partner organizations. The clinical, biochemical, immunological, neurophysiological, bacteriological and radiological laboratories are currently in operation.

ISM clinical chairs are based in leading clinical settings and scientific research centers of the country, which makes it possible to organize effective clinical training and provide to patients. ISM staff actively participates in treatment of patients and research at these organizations.

ISM maintains partnership relations (has long-term agreements on joint activities) with major leading medical institutions and scientific research centers of the country making it possible to pursue the policy, economically beneficial to both parties and implement joint, partnership programs.

HOSTEL

ISM have separate Girls Hostel. A female warden is responsible for the safety of the girl students in the hostel. The entrance and exit of the girl's hostel has an extra inner gate to ensure extra security and safety of the female students. A representative of the the ISM, IUK student Parliament, i.e. the Girl's senator also resides in the hostel and helps other girl students with their problems and assists them whenever required.

Common details of hostel premises

A group of three or four students are allotted a room, according room size. This room is furnished with three beds, three side tables, three chairs, one large sized study table, and a cupboard, Pillows, Bed sheets, Mattresses, Quilts and Blankets are provided by the hostel in charge. Each room has a large window for easy ventilation. Every room has an automated heating device that runs 24x7 during the winter snow season to maintain optimum temperature in the hostel rooms. Each hostel floor has a set of toilets and bathrooms that have a regular 24x7 cold and hot water supply

A laundry and a press service operate in the ISM, IUK Hostel for the benefit of the students residing in the hostel. Workers have been appointed to collect dirty clothes from the students, wash them and return back after ironing. This has saved the precious time of the students which they can utilize for studies. Additional workers have been appointed to maintain cleanliness and hygiene in the ISM, IUK Hostel. Rooms are cleaned and wiped on a daily basis. Toilets and Bathrooms are also cleaned daily with antiseptics and detergent. Bed sheets, Pillow Covers and Quilts are changed Weekly twice. This enables extra hygiene and cleanliness which is in line with the IUK Hostel Standards.

INDIAN MESS AT ISM

Food is the most important and the basic necessity of life. Keeping the necessity in mind, ISM has a special provision for food and catering to student needs through its mess/canteen.

This mess is run by Dr. Phani Bhushan Potu the ISM vice dean, (international students). The university's hostel has a canteen where Indian cooks work. Students have opportunities to enjoy the traditional Indian cuisine. However currently, the mess operates for Indian students only.

The Cook from India is a south Indian food specialist while the cook from North India excels in North Indian food. The Indian ISM mess has a variety of menu that includes chapatti, rice, vegetables, pulses, curd, sweets etc. Meals are served three times a day. There is a specified discipline in the ISM mess. Correct timings should be maintained by students.

Special Preparations can be ordered or requested by students of the ISM mess administration to celebrate birthdays, festival and parties etc.

TRANSPORT FACILITIES

ISM UIK has its own transportation facilities for students. There is a bus that transports students to educational centers that are located on the outskirts of Bishkek. The Kyrgyz transport system is well organized with mini Buses, Buses and Trolley Buses, connection every part of Bishkek city. The cost to use public transport is 10 Kyrgyz Soms for Trolley Bus, 15 Kyrgyz Soms for Bus and 10 Kyrgyz Soms for Mini Bus. Taxis are also available at reasonable prices.

STUDENTS LIFE

Life in Bishkek

Bishkek with its mesmerizing beauty steals the hearts of all the people. The life of students in Bishkek is unique in its own nature. With major and crucial part of their life being spent here in our University, we try to provide the best we can to cherish their memories of life in Bishkek.

IUK has excellent facilities for sports and leisure. All available within one of Bishkek's most exciting areas including sport sections, theatres, libraries and internet rooms.

The leadership of school and its faculty conduct cultural-and-organizational work with students including excursions to museums, sightseeing in Kyrgyzstan, going to theaters and trips to mountains.

The information on academic performance and attendance of students is made available in the school's website each semester to make sure the training process is transparent.

IUK provides accommodation in hostels with all modern facilities. Hostels have access to internet services and students are protected by the Association of students.

Shopping

With many Tourists, International Students, and Business men making their living in Bishkek, the city has developed gloriously in recent past.

The city is having many modern shopping malls and super markets, making it easy for the newbie to shop for the necessities. The super markets NARODNYI cornered at every major street has almost everything that the student require. Several others like Beta stores, Vefa centre, Tashrabat, Dordoi Plaza, TSum, Rahat palace, Bishkek Park etc are well established in the nearby premises to fulfill anything left out. Besides these several bazaars like The Osh, Dordoi, Orto-Sai, Alamedin, Madina etc are the regular centres of conventional marketing.

FRESHER'S PARTY ISM 2016

INTRODUCTION, EXAMINATION & SEMINARS FOR FRESHER STUDENTS IN INDIA

Seminar annually held by ISM focal point (only authorised representation of ISM) in last week of August. The one of ISM administrative staff from bishkek and director of ISM edutech pvt. ltd., vice dean Dr. Phani Bhushan Potu, ISM representative, some of successful ISM passed doctors, some senior students, all fresher students and their parents join this event.

The aim of seminars to clean their doubts, and to introduces with ISM family

After confirm of admission ISM administration often visit to Indian for final Examinational Introduction programme with new students

Seminar in 2013
at Jaipur

Presence of Dean of ISM (Dr. Usenova A.A.) and Vice Dean Dr. Phani Bhushan Potu along with selected students

Seminar in 2014
at Jaipur

Presence of Vice Dean Dr. Phani Bhushan Potu along with Presence of Former Revenue Minister Sh. Hema Ram Choudhary

Seminar in 2016
at Jaipur

Presence of Vice Dean Academic Dr. Salieva B.R. & Dr. Zhunusheva Z.Z. Professor of Med biology

CONVOCATION OF ISM

MIST-MCI COACHING

Our in house dedicated MCI program MIST- Medical Institute for screening test

We care for your comfort and also make you comparable to any medical graduate passing from Indian medical college in terms of quality of education. Education includes both Russian as well as the Indian Pattern right from the very first year.

All medical subjects are also taught by the best of best teachers from India. Each subject covered by best faculty from India at Bishkek as per Indian syllabus approved by Medical Council of Detailed content management for every student and preparation for MCI Screening Test.

Salient features of Specialised MCI training include:

- Conceptual academic session at Bishkek by best faculty from India.
- In depth knowledge of every subject at Bishkek by best faculty from India.
- Special attention towards preparation for MCI screening Test at Bishkek again by expert teachers from India.
- Practice of MCQ's asked in MCI screening test right from the very first year of medical curriculum, making the student stronger and more confident for any further examination/ performance of the student by a dedicated team of experts.
- Individual interaction with the students by specialists every year to identify th weak topics/ difficulties-provide solution, give strength and confidence to the student to improve his/her performance continuously.
- Special session just before the MCI Screening Test to ensure passing the exam in 1st attempt.
- Make him a better human being slowly but persistently... and make you proud of your decision.
- Our result speaks for our achievements...
- To your surprise, MIST coaching is included in the fee structure of ISM, however T&C apply.

ISMIAN'S SPEAK

DOCTORS SPEAK

Dr. Lalit Bhardwaj

"Being a "Doctor" means being incredibly compulsive, it has nothing to do with flights of intuitions or brilliant diagnosis or even saving lives. It's dealing with a lot of people with chronic diseases that you really can't change or improve but you can help patients. You can make a difference in their lives."

So, I would like to refer ISM for my friends as a Great Institution for study and become a "Doctor" & fulfill their dreams.

Dr. Lalit Bhardwaj

Dr. Rohit Sharma

" Go. confidently in the direction of yours dreams,
Live the Life you have imagined
I am not a product of my circumstances.
I am a product of my own decisions....
So, "Be loud, be Bold... Be a "Doctor"
Thank you ISM

Dr. Rohit Sharma

Dr. Monika Kunjam

" I always wanted to become a "Doctor" from my childhood but as usual it's very difficult without a good guidance and get a best institution . I found ISM (International School of Medicine) as best institution for study and fulfill our dreams who want to be a "Doctor".

Dr. Monika Kunjam

Dr. Saurabh Choudhary

ISM does not only make world class Doctors but also teaches us to be independent Rational & Best human being we could ever be. ISM Doctor's among all Fmgs from all over world are much more appreciated and respected.

Dr. Saurabh Choudhary

STUDENTS SPEAK

Garima Sharma

" Quality education provides a way tofuture.
Now days its hard to first quality education in budget. Where on other hand ISM provides a great opportunity to Student with ambition to become a doctor to fulfill their dreams in affordable budget. This institute gives best MCI result among all over Medical Institute of World.

Garima Sharma

Sheelu Sharma

"Doctors are equivalent to God"

ISM is providing a great platform to indian students to study in abroad and fulfill their dreams and serve for the nation.

Sheelu Sharma

Hiven Vora

"Becoming graduates from ISM, is the greatest opportunity of my life"

Hiven Vora

Vishakha Mathur

"Biggest Achievement of life is living your dreams".
ISM-IUK has provided this opportunity in my life of living and transforming my dream into reality.
This institution is providing best medical education & special faculties for MCI preparation.

Vishakha Mathur

ADMINISTRATIVE STAFF

The staff of the International school of Medicine includes Kyrgyzstan's qualified specialists in general and applied medicine. Most of ISM staff was trained in leading medical centers of Russian Federation and Europe. At present the ISM has 231 staff members with 14.3% of them being doctors of medical sciences and 18% being candidates of medical sciences, 15% being senior instructors, and 52.7% are instructors.

The Training process at school, in a range of disciplines, involves instructors from India, coming on a contractual basis to the International school of Medicine where they participate in joint research and teach particular subjects.

Partner Organizations of ISM (Clinical Bases)

In Particular, the ISM partners that jointly conduct training, research and treatment include:

- The Bishkek Scientific and Research Institute of Traumatology and Orthopedics.
- The National Center for Oncology under the Ministry of Health of Kyrgyz Republic
- The Kyrgyz Scientific and Research Institute of Balneology and Medical Rehabilitation
- Research Institute of "Preventive Medicine" under the Ministry of Health of Kyrgyz Republic
- The National Center for Mental Health under the Ministry of Health of Kyrgyz Republic
- The National Clinical Hospital for infectious Diseases under the Ministry of Health of Kyrgyz Republic.
- The National Pathological Anatomy Bureau under the Ministry of Health of Kyrgyz Republic
- The Kyrgyz state medical institute of training and post qualification
- The Bishkek City's Hospital #6
- The National Hospital-Clinic of Akhunbaev
- The National Forensic Expertise Bureau
- The National Center for Maternity and Childhood
- The Republican center for Cardiac Surgery and Transplantation of Organs
- Maternity Hospital # 3, 4, 6
- Private Medical centers: Er kai, Kafmed Center
- Center for Prophylactic Medicine
- The rail-road hospital
- National Urological center

The use of state-hospital and clinical settings in the training process of IUK ISM, is set with the special resolution of the Ministry of Health of Kyrgyz Republic

WHY TO CHOOSE ISM

Amongst many of the reasons that make us your choice, following are few to mention:-

- ✓ First institute in CIS countries to launch MD Physician programme in English medium 5 year course duration.
- ✓ First institute to offer coaching of MCI, USMLE, AMC and other global medical license examinations from the first year itself, thus making us able to produce best results worldwide in recent past.
- ✓ Offer affordable fee structure worldwide.
- ✓ Offer private bus service for local transportation.
- ✓ 24x7 government and private security for healthy and secure accommodations.
- ✓ We have tried to build home away from home with meals cooked by Indian cook, clothes washed and ironed.
- ✓ Student who will be continue in top 5 position and for excellent academic performance from 1st to 3rd years, their tuition fees of 4th & 5th year will be free.
- ✓ ISM is listed in world directories of medical school published by WHO and ISM also listed in medical council of India (MCI) as per rules regulation to take admission in abroad.
- ✓ Separate girls and boys hostel with Indian Caretakers.

Heartiest congratulation to all MISTians who are celebrating their success. I'm extremely elated about everyone's result. I dedicate my score to my parents, the only gods I worship. It has been a long way. I thank my med school ISM, Bishkek for my basics! And all teachers who have encouraged me and wish the best for me. I credit MIST for the result. Vineet sir, you've guided us at every step and encouraged everyone to do their best. honestly MIST felt like a second med school, and I didn't realize surgery could be learnt with fun before!

I profoundly thank Sakshi Arora ma'am because without her Ob/gyn wouldn't have been this simple. She taught all of Ob/gyn in a few days! Her notes and tests helped me a lot! Considering that 35 questions were asked, it improved scoring. I also thank Azam sir, who rightly emphasized on the basics of the pre-clinical subjects Anatomy and Biochemistry, definitely demystified. I thanks Ashish sir for his humor-infused physiology classes, the concepts of which were largely tested. I thank the entire faculty Sashwat sir (thoroughly enjoyed every minute in his classes), Deepa ma'am, Rajiv sir, Aksay sir, Rajat sir, Ratnesh sir, Shivika ma'am, Ila ma'am, Yogesh sir and all others!

I thank the staff of MIST who were supportive. I thank all my friends who somehow believed in me more than I did myself. I thank Phani sir who has encouraged me constantly. Now I realize the effects of the long strenuous class, the stream of consecutive test (which boosted the competitive energy) and the compilation of high-yield points. All have payed off finally! I'm indebted to and will always believe in the might of MIST.

Finally I wish all those who are appearing in the next exam, the very best. All the best MISTians for your future endeavours.

- Certificate of completed intermediate education.
- Passport with appropriate entry visa.
- Medical reference- 086 form, (medical inspection can be provided in the Medical Center of the ISM).
- Application form.
- 10 photographs (3x4cm).

Necessary documents when being transferred from other Higher Medical Institution:

- Certificate of completed intermediate education.
- Academic reference from previous higher Medical Institution
- Extract from order on expulsion from previous Higher Medical Institution.
- Extract from order on expulsion from previous Higher Medical Institution.
- Certificate of Preparatory entry visa.
- Passport with appropriate entry visa.
- Medical reference - 086 form, (Medical inspection can be provided in the Medical center of the ISM).
- Application form.
- 10 photographs (3x4cm).

Passport and Visa Procedures

If you have decided to study at the International School of Medicine (ISM), you need to have the following when entering the Kyrgyz Republic (KR):

- Authorization on entry given on ISM application.
- Consideration of request on visa support by the Ministry of Foreign Affairs of KR during 1 month.
- Entry visa can be given out in diplomatic representation missions and consular departments of KR, abroad or consular agency at the "MANAS" airport.

After you have arrived at ISM

- Your passport shall be registered by Ministry of Interior of KR within 5 days from the date of arrival, excluding holidays and weekends.
- Assistance in registration and visa extension.
- Passports must be presented to the Department of International Affairs, 1 month before the expiry of visa.
- Failure to meet registration and visa terms results in fine, set by Ministry of Interior of KR.

Deadline for admission of international students depends on the selected program: Fall semester-Until 5th October

- Sprint semester - Until 5th February
- Postgraduate studies - During academic year
- PhD studies - During academic year
